

WHY WE REPLACE GAS VALVE ON EVERY JOB?

Reused gas valves fail the final pressure test at rates between 15-30%

SEQUENCE OF FAILURE

First installation

Metal deformation
and thread galling

Dismantling

Micro-fractures
and thread stripping

Retightening = failure

Structural failure,
misalignment and gas leak

NEW VALVE

0.5%
LEAK

REUSED VALVE

15-30%
LEAK

BREAK DOWN PRICE OF

\$80

MATERIAL

LABOUR

COMPLIANCE

1 YEAR WARRANTY

We replace it because our own test would fail if we didn't.
